Rapid

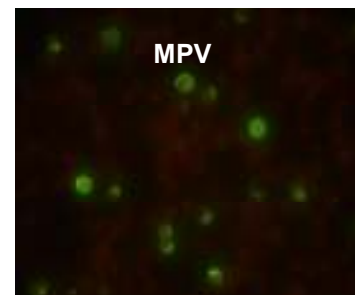

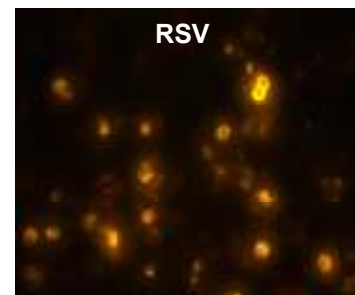

Rapid detection of Influenza A, RSV, MPV and other respiratory viruses from respiratory specimens. If screening results are positive a second test can be performed to identify Influenza B, Adenovirus, Parainfluenza 1, 2 or 3.

Sensitive

Sensitivity of DFA exceeds that of a rapid cartridge technology* and reduces the potential of false negative results.

The Complete Testing Solution

In addition to rapid identification of eight major respiratory viruses direct from respiratory specimens, the D³ Double Duet can be combined with the R-Mix ReadyCells™ to offer the complete respiratory

Ordering information:

Kit	
01-320000	D ³ Double Duet DFA Respiratory Virus Screening and ID kit
F-96-0102-12	R-Mix ReadyCells Vials
05-370100	R-Mix and Refeed & Rinse media
